SERVICE BULLETIN #1006

SUBJECT ~~Sprocket & Drum Assys.~~ Color Coding

MODEL D44, S44 DATE ~~10/17/57~~

The following table is provided as a quick reference to assist you in identifying sprocket and drum assemblies by a color code so that they may be matched with the correct chain when installed on Model D-44 and Super 44 saws:

Color	Pitch	No. of Teeth	Chain	Sprocket, Drum & Bearing Assy.	Sprocket & Drum Assy.
Green	1/2"	6	P8	51793	51794
Blue	7/16"	7	Oregon 61C	51178	51573
Red	.404	7	P65	51774	51775

If by chance the color is removed from any of these assemblies, they may be identified by a number stamped on the drum to indicate the pitch thus:

Stamped	Pitch Indicated
8	8/16" or 1/2"
7	7/16"
6.5	6 1/2 Sixteenths or .404"
