SERVICE BULLETIN # 1023

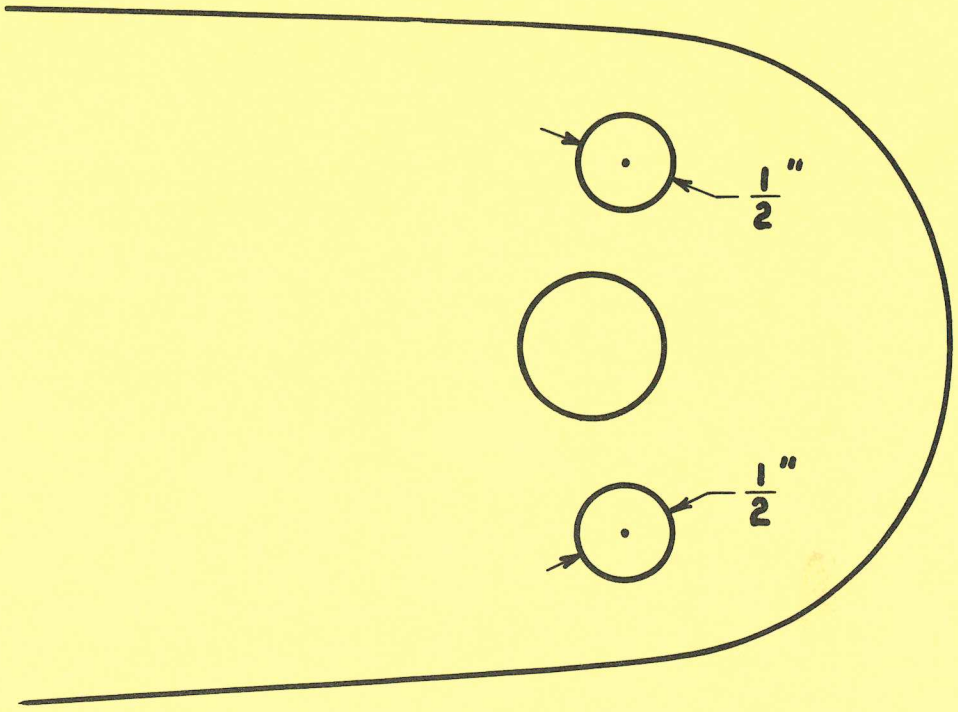

SUBJECT Outboard Handle and Bars.

MODEL ALL (Except 5-49, 7-55 & 99 DATE 6-13-58

The following list of chain saw bars can be used with the outboard handle assembly, part number 19937, when the bars have been drilled with two additional holes to accommodate the handle bosses:

51405A	28398B	52558
51407A	28397B	52553
51409A	28396B	
51821A	28395B	
51823A	28394B	
51403B		

This template drawing will assist in the correct location of the mounting holes.

NOTE: If the mounting holes are mislocated slightly so that one breaks through into the chain groove, no damage to chain tangs will result since the handle bosses are made of the relatively soft aluminum.
