McCULLOCH

SERVICE BULLETIN # 1041

SUBJECT RICHER FUEL MIXTURE

MODEL **MAC D30** and D36 DATE 11/4/58

Use a 10 to 1 *fuel mixture*

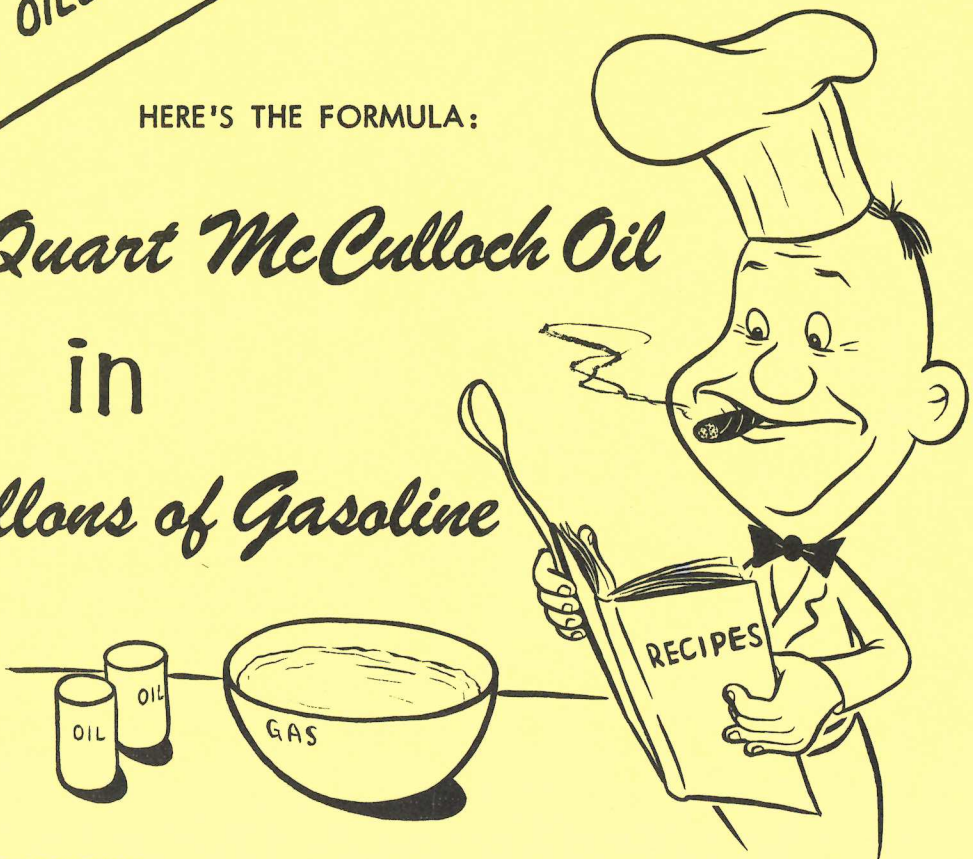

It's a richer fuel mixture than the standard 20:1 recommended for all other McCulloch chain saw engines. Don't worry about excess carbon collecting in the engine or exhaust ports, because the LUBRI-MAC Chain Oiler extracts the lubricant before the mixture reaches the combustion chamber.

HERE'S THE FORMULA:

One Quart McCulloch Oil

in

2-1/2 Gallons of Gasoline
