McCULLOCH

SERVICE BULLETIN #1045A

SUBJECT COILS - TESTING

COILS MARKED L8 AND LATER

MODEL ALL

DATE 12/31/58

The specifications in this bulletin replace those of Service Bulletin #1045.

Coils marked L8 and later (A-9, B-9, C-9, etc.) should test within the specifications listed below when tested with a Graham Model 51 Coil and Condenser Tester of accurate calibration.

Continuity in OHMS		Coil	Coil	Gap
Secondary	Primary	Index	Test	Index
3500 Min.	1.10 Min.	66 Min.	16 Min.	29 Min.
3900 Max.	1.50 Max.	72 Max.	18 Max.	33 Max.

The above readings should be obtained with the coil placed on a wooden surface, with the positive (red) lead from the tester connected to the primary lead and the negative (black) lead from the tester connected to the lamination and ground lead from the coil.
