McCULLOCH

SERVICE BULLETIN # 1086A

MODEL **MISCELLANEOUS** DATE 3/30/60

SUBJECT **NEW CLOSED-END BEARING AND PISTON PIN**

THIS INFORMATION SHOULD BE ADDED TO SERVICE BULLETIN #1086.

Caution

Before removing or installing needle bearings in the piston, heat the piston under a heat lamp, or in an oven to the temperature of boiling water, to expand the bearing bore of the piston boss. Expansion of the piston will make the removal and installation of the bearings not only much easier, but will help prevent damaging the bearings.
