McCULLOCH CORPORATION
SERVICE BULLETIN

1136A

December 27, 1963

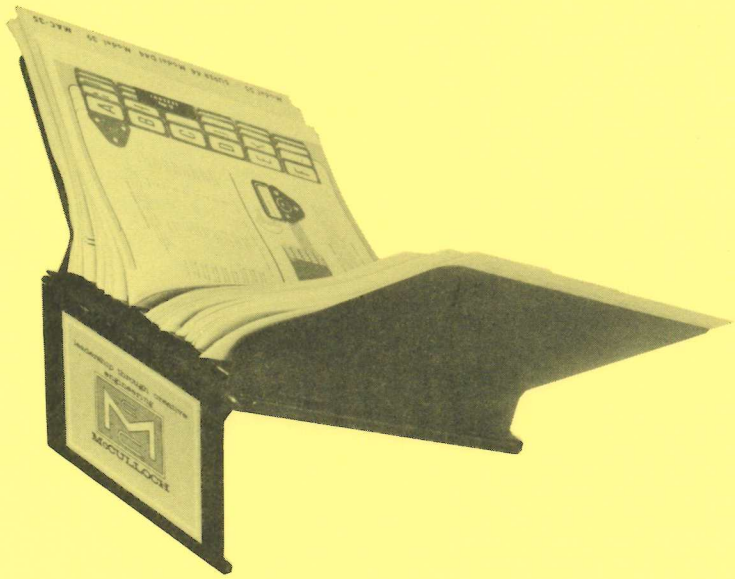

MODEL: ALL

SUBJECT: KEEPING SERVICE MATERIAL AVAILABLE FOR QUICK REFERENCE

NOTE: This Service Bulletin replaces S/B #1136

There is nothing that delays service work as much as a missing service bulletin or a misplaced illustrated parts list. There's nothing that makes work easier than having all printed service material in one safe and handy place.

At the request of a number of your distributors, we investigated all the various kinds of filing aids on the market and determined from actual use, that the handiest type was the multi-post binder. We checked the various makes on the market and picked out one that was not only of top manufacturing quality, assuring long life, but one to which it was easy to add additional printed material.

The unit shown in the illustration has six binders, each with a capacity of one-inch thickness of printed material. Each binder can be removed without disturbing any of the others. The holder is made of strong, light metal and painted black with the McCulloch trade mark in yellow on the front panel. The unit is one that you'll be proud to have on your desk, counter or work-bench. We have them and we know how handy they are. If more than six inches of binding area are required, extra bases and binders are available and will fit directly into the basic unit.

The basic unit with six binders, stand and wings, can be ordered through your Distributor under P/N ADV 1211. Cost is $8.10 Net.

Extensions can be ordered under P/N ADV 1211E. Cost is $7.50 Net.
