McCULLOCH

SERVICE BULLETIN # 1140

SUBJECT: HEAVY DUTY FUEL PUMP DIAPHRAGM, P/N 53164

MODEL 1-42, 1-52, 1-62, 1-72, 1-82, 1-85

DATE 8/15/61

An improved, heavy duty, Fuel Pump Diaphragm, P/N 53164, is available for service replacement in the Tillotson Carburetors used on Model 1-42, 1-52, 1-62, 1-72, 1-82, and 1-85 chain saw engines. The heavy duty diaphragm is made from a new material which is not affected by fuel blends. The new diaphragm has a longer operating life than that of earlier types used and is especially recommended for carburetors installed on chain saws using a 60-inch or longer bar. The new, heavy duty diaphragm will replace Diaphragm, P/N 57574, used on the 1-42 series chain saw carburetors, and Diaphragm, P/N 51595A, used on some earlier model carburetors.
