SERVICE BULLETIN

NO. 1569

MODEL Mini-Mac

DATE August 19, 1974

SUBJECT Improved Mini-Mac Fuel Filter/Pickup.

An improved and simplified Fuel Filter/Pickup, PN 84956 (Fig. 1), is now supplied as the standard replacement service item for the Mini-Mac power unit; it backfits the Fuel and Oil Tank Assembly, PN 83899, and therefore has the same part number as the previous filter. The T-shaped end has two functions: it prevents the filter from being pushed all the way inside the tank (beyond the neck of the outlet), and it eliminates the need for Pin, PN 85057 (Fig. 2).

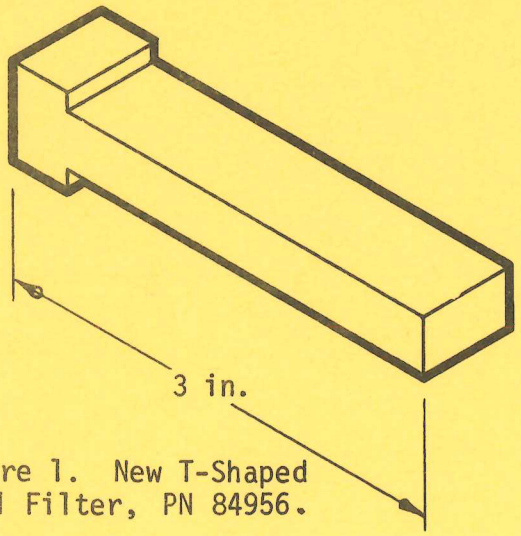

Figure 1. New T-Shaped Fuel Filter, PN 84956.

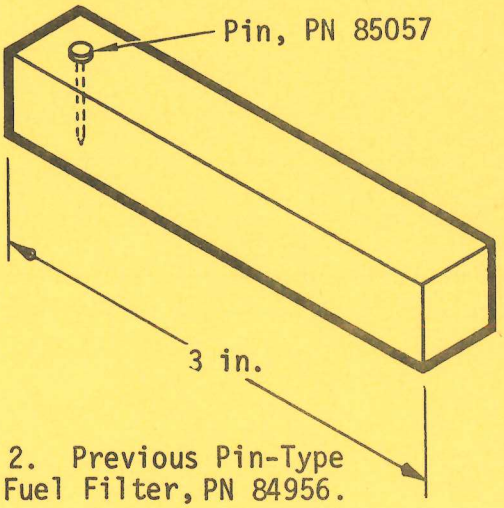

Figure 2. Previous Pin-Type Fuel Filter, PN 84956.

Manufacturer's Suggested List Price for Fuel Filter/Pickup, PN 84956, is $0.35.
