McCULLOCH SERVICE BULLETIN

NO. 1579

MODEL S 250, S 550, SP 125C, SP 105, PM 105 DATE November 25, 1974

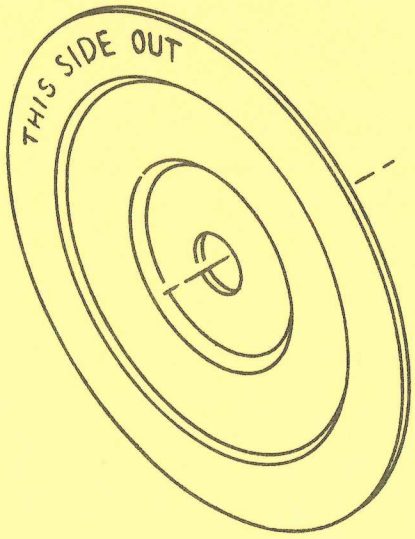

SUBJECT CLUTCH PROTECTOR PLATE

A new Clutch Protector Plate, P/N 91055, is now being installed on all current models of the above listed saws.

The purpose of the protector plate is to prevent the entry of sawdust or other foreign material to the clutch or to the interior of the clutch drum. The plate also serves as a heat and spark shield if the saw is improperly operated with excessive clutch slippage.

We recommend that you advise customers that the protector plate is available as they come in to have their units serviced, and suggest that they have one installed to provide the protection described above.

Clutch Protector Plate, P/N 91055, has a Manufacturer's Suggested List Price of $0.65.
