McCULLOCH SERVICE BULLETIN

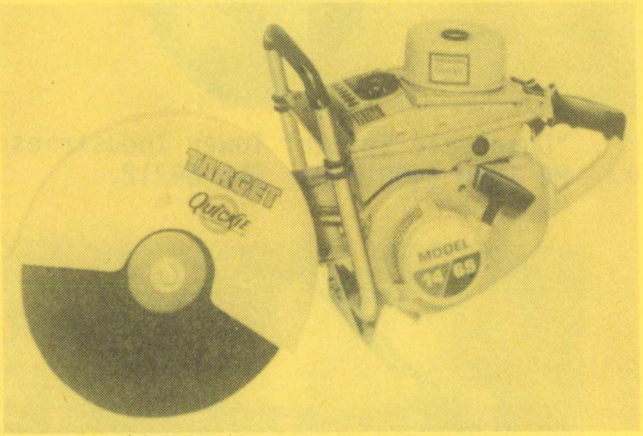

NO. 1585

MODEL OEM (Original Equipment Manufacturer) Products. DATE May 12, 1975

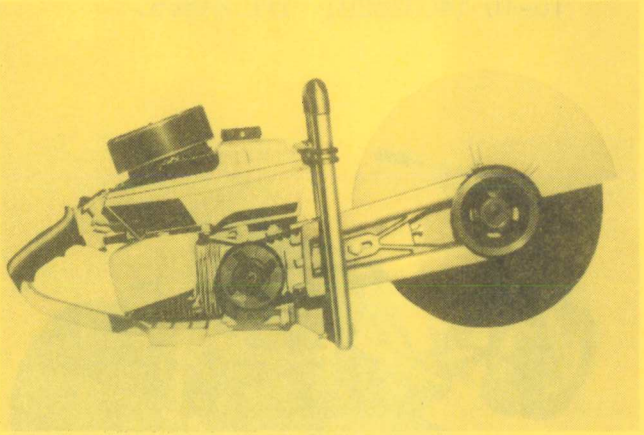

SUBJECT Servicing and Warranty.

McCulloch OEM products are special products that are assembled in part or in total by McCulloch Corporation but are sold to other manufacturers who have their own systems of distribution.

Illustrated below are the present OEM products using basic McCulloch power units. Below each illustration is the product name, manufacturer, basic McCulloch power unit, and illustrated parts list covering that model. (Note: IPLs P/N 89212 and P/N 89665 may be ordered from your Distributor.)

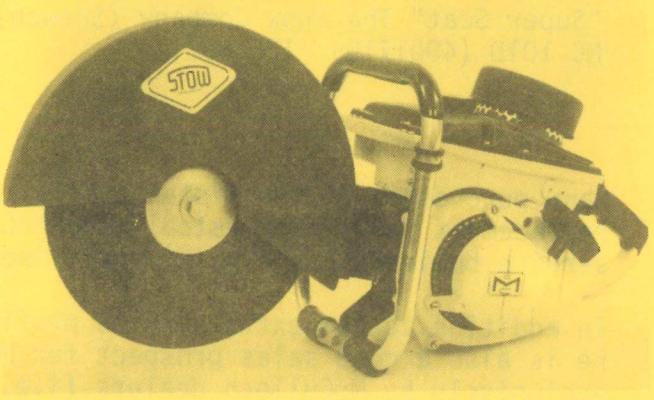

"Quickie" Robert G. Evans Co.
7-10 (400261D) IPL 87679.
795L (400175D) IPL 84433.*

LITHO IN U.S.A.

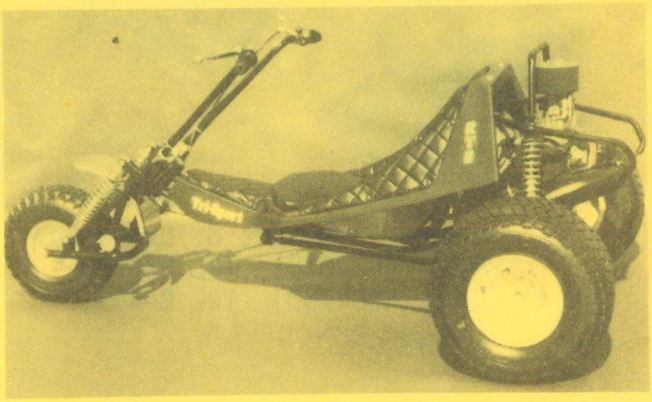

"Porta Charger" Learavia Corp.
10-10 (400262D) IPL 89665.

"Dunecycle Spider" Tower Industries
MC 101D (400171D) IPL 89212.

"Super Scat" The Snow Company (Snowco)
MC 101D (400171D) IPL 89212.

"RTS-MAC" Alsport Inc.
MC 101D (400171D) IPL 89212.

Many purchasers of the listed special products will seek service repair and replacement parts from established McCulloch Servicing Dealers. This potential service business can significantly increase dealer profits.

In addition to the extra service profit the special products customer represents, he is also a good sales prospect for McCulloch manufactured items that are sold exclusively by McCulloch dealers (i.e. chain saws, oil, generators, etc.).

OEM PRODUCT WARRANTY

The basic McCulloch power units used in OEM products other than cycles or recreational vehicles are covered by the same warranty that applies to chain saws. The warranty does not apply, however, to failures to:

(a) Attachments.
(b) Basic unit failures caused by the attachments.
(c) Basic unit failure or wear due to highly abrasive conditions under which the unit was operated.
(d) Basic unit used in motorcycles or any other recreational vehicles (i.e. Dunecycle, Alsport, or Snowco products).

Warranty labor on an OEM product will be based on the time allowed in the Flat Rate Labor Schedule, at the standard prevailing labor rate. Additional compensation of 30% will be allowed on the total labor for each repair (30% not allowed for Operation Z-1) based on the standard rate.

Use the standard Warranty Request form, P/N 60980, when requesting reimbursement for OEM warranty repairs. Complete all sections on the warranty form as usual and be sure to note the name of the equipment in the box identified "Type of Equipment." Also include the engine model and serial number.
