McCULLOCH SERVICE BULLETIN

NO. 1619

MODEL All Current Generators

DATE November 1, 1976

SUBJECT Addition of Washers, P/N 21655

To provide better thread engagement of the stator adjusting screws, a standard 5/16 inch, flat Washer, P/N 21655, is now being placed between each stator post and the stator support plate.

The following list gives the serial numbers of the last units produced without the washers.

UNIT	SERIAL NUMBER	UNIT	SERIAL NUMBER
MAC 1250	12-16545	H-1500G	12-69051
MAC 1600	12-21472	H-2000G	12-70005
MAC 2400	11-42817	H-3000F	11-68025
H-1500B	12-18533	H-153	B-306309
H-2000B	12-24237	H-204	B-406303
H-3000B	11-43997	H-307	B-706320
H-1500C	12-054239	AL-351	B-306323
H-2000C	12-058939	AL-402	B-406287
H-3000C	11-75116	AL-703	B-706287
H-1500D	12-9847		
H-2000D	12-31748		
H-3000D	11-77675		

Units with serial numbers larger than the ones listed above will contain four Washers, P/N 21655. Also, all H-1500F, H-2000F, and H-3000G models will be produced with the washers.

It is not necessary to rework earlier models produced without the washers. However, if increased thread engagement of the stator adjusting screws is desired, the washers can be installed on earlier models at the time other routine service is being performed.
