McCULLOCH®

# PROFESSIONAL

## Pro Mac® 10-10S and 700

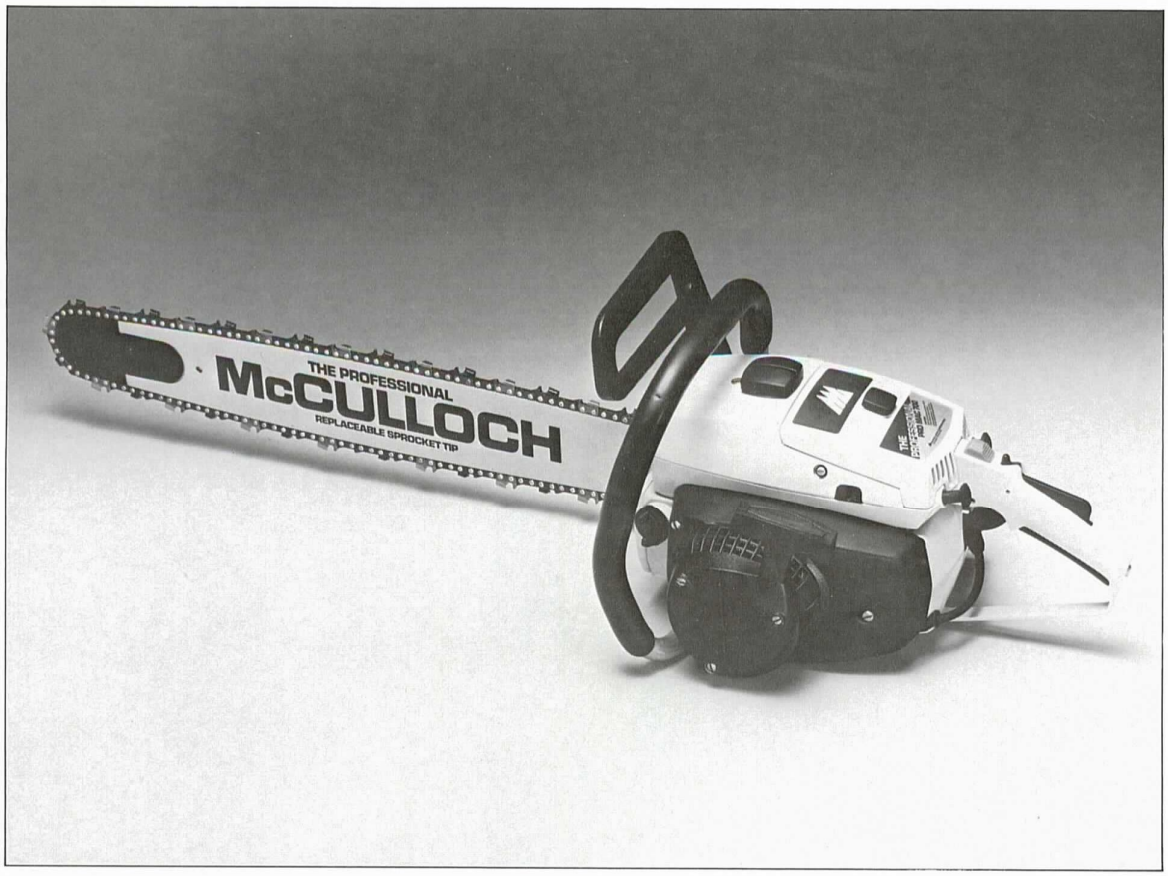

# When your job depends on it.

The PRO MAC 10-10S and PRO MAC 700 are McCulloch's "Old Work-Horses", favorites for over 25 years.

The 10-10S packs a 57cc engine that many veterans swear by — plus the full feature package of electronic ignition, auto and manual bar and chain oiling, flag lever chain brake, steel bucking spike and a DSP compression release valve for easier starting.

The PRO MAC 700 — a true logging saw built to tackle the toughest timber — gives you all the above features with the stepped up horsepower of 70cc.

| | Engine Type | Engine Displacement | Bar Length | Carburetor | Sprocket Type | Cylinder Bore | Ignition | Fuel Mix | Fuel Capacity Oz. | Oil Capacity Oz. | Automatic Oiler | Manual Oiler | Comp. Release (DSP) | Dry Weight (PUO) |
